

Viktor Korniyaka

Personal information:

Passport: Viktor Korniyaka
Age: 29
Education: KNEU - "Kiev National Economic University"
Experience: 3+ years in java developing
Phone: +380 (98) 621-21-21
Email: korniyaka.viktor@gmail.com

Interests:

- High load applications
- Back-end development
- New technologies

Skills:

Programming Technologies	J2SE: Exceptions, Java I/O, Threads, Collections, JDBC J2EE: Servlets, JSP, JSTL
J2EE Frameworks	Spring MVC, SpringSecurity, Hibernate,
Building Tools	Maven
Automated testing	JUnit, AcceptanceTests - thucydides
Application and http servers	Tomcat, GlassFish, WebLogic
Internet technologies	Java Server Pages (JSP), JSF, Bootstrap, AngularJS
Database	PostgreSQL, MySQL, hsqldb
Server	amazonaws
Others:	Git, Agile-processes, Jira
Teaching:	Java SE & EE

Work Experience:

 <p>June 2016 - VTB bank https://vtb.ua/ru/</p>	<p>Java developer</p> <p>Support for the banking portal for working with customers and the development of new features Upgraded the deposits products for bank</p> <p>Tehnologies: Server: Web-Sphera, IBM Integration Bus 10 UI: Servlets, JavaScript DB: Oracle, JDBC</p>
 <p>February 2015 - June 2016 State Enterprise "Information and Resource Center" https://usr-online.irc.gov.ua/usr/</p>	<p>Java developer</p> <p>Access system for government officials to obtain documents without cost from The United State Register of Legal Entities and Individual Entrepreneurs of Ukraine Development and support the admin panel to control user management, registration of public authorities. Generating reports about work of system and users, with a further download to excel.</p> <p>Second project is: The pre-filing for entering the final benefit owners and substantial participation in the Unified State Register of Legal Entities and Individual Entrepreneurs Participated in the development frontend and backend functionality for filing form4. I developing functional that relates to the preparation stage of the documentation, reject document, download and unloading documents in different formats.</p> <p>Project for ministry of Justice. Web application - State Register of Ukraine Technology: EJB, JPA Server: Web-Logic, GlassFish DB: Oracle</p>
 <p>ОКМПЮТЕРНО-ІНФОРМАЦІЙНІ ТЕХНОЛОГІЇ October 2014 - February 2015 Institute of Computer Information Technologies http://it.maup.com.ua</p>	<p>Teaching Java SE & EE</p> <p>One of my most responsible task was mentoring of students group and preparing them to start their career as Java Developer and E-Commerce professionals. The course program contained all and a little more information for a successful start to the position of junior java developer</p>

January 2013 - October 2014

Client21.com CRM system

<http://client21.com>

Java Developer

Development and support CRM system. Design and implementation of web backend part of application and integration with external service such as GoogleMap, privat24. Main goal of application is maintaining client base, the formation and preparation of statistics on the work done, organize the communications between people of team. Email and SMS sending.

Tehnologies: Spring 3.2 (Spring MVC, REST, security), hibernate 4
Database: PostgreSQL
UI: Bootstrap JSP HTML
Server: amazonaws Tomcat

Courses:

EngagePoint University
01.15.2014 - 21.03.2014

Successfully completed Java EE Development

Our project:

test message service (send email, sms, jms, soap messages)

our team: 7 developers

Gaining Experience:

team Development

pair programming

new technologies

holding demo

agile-processes

Test message service (send email, sms, jms, soap messages) Technology: JSF, primefaces, hibernate3, SpringDataJpa, JMS, SOAP

DB: hsqldb, MySQL,

smtp server, smpp server, thucydides

Others: Git, Agile-processes, Jira, GlassFish
